# Computer Aided Translation

Philipp Koehn

17 November 2020

# Why Machine Translation?

**Assimilation** — reader initiates translation, wants to know content

- user is tolerant of inferior quality
- focus of majority of research

# Why Machine Translation?

**Assimilation** — reader initiates translation, wants to know content

- user is tolerant of inferior quality
- focus of majority of research

**Communication** — participants don't speak same language, rely on translation

- users can ask questions, when something is unclear
- chat room translations, hand-held devices
- often combined with speech recognition

# Why Machine Translation?

**Assimilation** — reader initiates translation, wants to know content

- user is tolerant of inferior quality
- focus of majority of research

**Communication** — participants don't speak same language, rely on translation

- users can ask questions, when something is unclear
- chat room translations, hand-held devices
- often combined with speech recognition

**Dissemination** — publisher wants to make content available in other languages

- high demands for quality
- currently almost exclusively done by human translators

# Why Machine Translation?

**Assimilation** — reader initiates translation, wants to know content

- user is tolerant of inferior quality
- focus of majority of research

**Communication** — participants don't speak same language, rely on translation

- users can ask questions, when something is unclear
- chat room translations, hand-held devices

# MT Quality and Productivity

System	BLEU	Training Sentences	Training Words (English)
MT1	30.37	14,700k	385m
MT2	30.08	7,350k	192m
MT3	29.60	3,675k	96m
MT4	29.16	1,837k	48m
MT5	28.61	918k	24m
MT6	27.89	459k	12m
MT7	26.93	230k	6.0m
MT8	26.14	115k	3.0m
MT9	24.85	57k	1.5m

- Same type of system (Spanish–English, phrase-based, Moses)
- Trained on varying amounts of data [Sanchez-Torron and Koehn, AMTA 2016]

# MT Quality and Productivity

System	BLEU	Training Sentences	Training Words (English)	Post-Editing Speed
MT1	30.37	14,700k	385m	4.06 sec/word
MT2	30.08	7,350k	192m	4.38 sec/word
MT3	29.60	3,675k	96m	4.23 sec/word
MT4	29.16	1,837k	48m	4.54 sec/word
MT5	28.61	918k	24m	4.35 sec/word
MT6	27.89	459k	12m	4.36 sec/word
MT7	26.93	230k	6.0m	4.66 sec/word
MT8	26.14	115k	3.0m	4.94 sec/word
MT9	24.85	57k	1.5m	5.03 sec/word

- User study with professional translators
- Correlation between BLEU and post-editing speed?

# MT Quality and Productivity

BLEU against PE speed and regression line with 95% confidence bounds  
+1 BLEU  $\leftrightarrow$  decrease in PE time of  $\sim 0.16$  sec/word, or 3-4% speed-up

# MT Quality and PE Quality

better MT  $\leftrightarrow$  fewer post-editing errors

# Translator Variability

	<b>HTER</b>	<b>Edit Rate</b>	<b>PE speed (spw)</b>	<b>MQM Score</b>	<b>Fail</b>	<b>Pass</b>
TR1	44.79	2.29	4.57	98.65	10	124
TR2	42.76	3.33	4.14	97.13	23	102
TR3	34.18	2.05	3.25	96.50	26	106
TR4	49.90	3.52	2.98	98.10	17	120
TR5	54.28	4.72	4.68	97.45	17	119
TR6	37.14	2.78	<b>2.86</b>	97.43	24	113
TR7	39.18	2.23	<b>6.36</b>	97.92	18	112
TR8	50.77	7.63	6.29	97.20	19	117
TR9	39.21	2.81	5.45	96.48	22	113

- Higher variability between translators than between MT systems

- **Interactivity**
- Choices
- User Studies
- Confidence
- Adaptation

- Traditional professional translation approaches
  - translation from scratch
  - post-editing translation memory match
  - post-editing machine translation output
- More interactive collaboration between machine and professional?

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Professional Translator

|

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Professional Translator

He planned | for months

- Show  $n$  next words

Olvidarlo. Es demasiado | **arriesgado.** Estoy haciendo

- Show rest of sentence

# Spence Green's Lilt System

- Show alternate translation predictions

**C** Les étudiants eux-mêmes n'ont pas les moyens de se rendre à des cours, nous essayons de les aider de cette manière.

The students themselves cannot be required to attend courses, we are trying to help themselves cannot

**D** Dans le cadre de l'Institut Jedlička, nous transférerons ce projet dans un nouveau bâtiment.

themselves could not  
themselves do not  
themselves cannot afford

**E**

- Show alternate translations predictions with probabilities

To equip students with training, we have reduced mobility and Institute Jedlička, we will transfer this project to a new building.

■ routinely  
■ steadily  
■ regular  
■ regularly

Des enseignants se rendent régulièrement auprès d'eux et proposent des activités qui les intéressent et les aident à apprendre.

Teachers regularly visit Jedlička's activities and propose activities that interest them and help them learn.

Les étudiants eux-mêmes n'ont pas les moyens de se rendre à des cours, nous essayons de les aider de cette manière.

make regular  
are regularly

# Prediction from Search Graph

Search for best translation creates a graph of possible translations

# Prediction from Search Graph

One path in the graph is the best (according to the model)

This path is suggested to the user

# Prediction from Search Graph

The user may enter a different translation for the first words

We have to find it in the graph

# Prediction from Search Graph

We can predict the optimal completion (according to the model)

# Run Time

24

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Professional Translator

He planned for months to give a lecture in Baltimore | in

# Word Alignment Visualization

## Input Sentence

Er hat seit Monaten geplant, **im** November einen Vortrag in Baltimore zu halten.

## Professional Translator

He planned for months to give a lecture in Baltimore | **in**

# Shading off Translated Material

## Input Sentence

Er hat seit Monaten geplant, **im** November einen Vortrag in Baltimore zu halten .

## Professional Translator

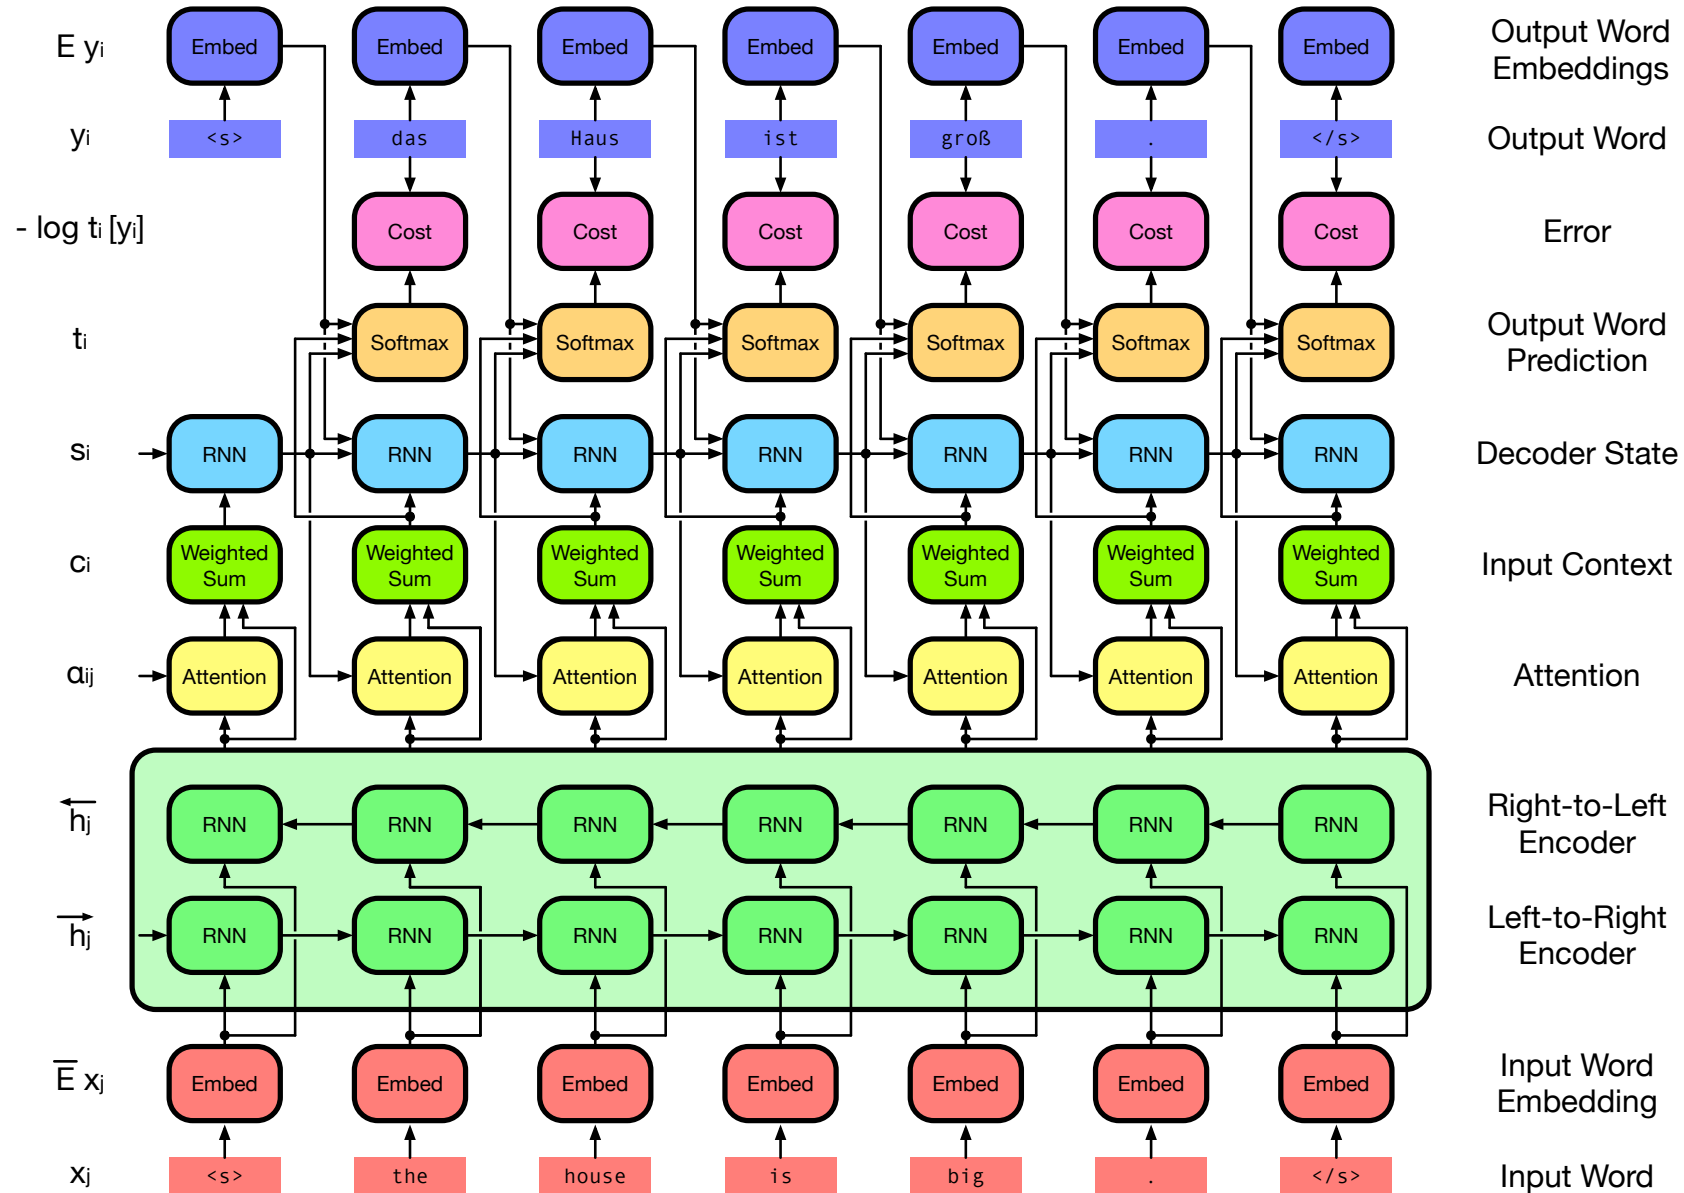

He planned for months to give a lecture in Baltimore | **in**

- How can we do this?
  - word alignments by-product of matching against search graph
  - automatic word alignments (as used in training)
- User feedback
  - users like interactive machine translation
  - ... but they may be slower than with post-editing machine translation
  - user like mouse-over word alignment highlighting
  - user do not like at-cursor word alignment highlighting

# Neural Interactive Translation Prediction

29

- The model produces words in sequence

$$p(\text{output}_t | \{\text{output}_1, \dots, \text{output}_{t-1}\}, \vec{\text{input}}) = g(\hat{\text{output}}_{t-1}, \text{context}_t, \text{hidden}_t)$$

- Translation prediction: feed in user prefix

# Example

**Input:** *Das Unternehmen sagte, dass es in diesem Monat mit Bewerbungsgesprächen beginnen wird und die Mitarbeiterzahl von Oktober bis Dezember steigt.*

	Correct	Prediction	Prediction probability distribution
✓	the	the	<b>the (99.2%)</b>
✓	company	company	<b>company (90.9%)</b> , firm (7.6%)
✓	said	said	<b>said (98.9%)</b>
✓	it	it	<b>it (42.6%)</b> , this (14.0%), that (13.1%), job (2.0%), the (1.7%), ...
✓	will	will	<b>will (77.5%)</b> , is (4.5%), started (2.5%), 's (2.0%), starts (1.8%), ...
✓	start	start	<b>start (49.6%)</b> , begin (46.7%)
	inter@@	job	job (16.1%), application (6.1%), en@@ (5.2%), out (4.8%), ...
✗	viewing	state	state (32.4%), related (5.8%), <b>viewing (3.4%)</b> , min@@ (2.0%), ...
✗	applicants	talks	talks (61.6%), interviews (6.4%), discussions (6.2%), ...
✓	this	this	<b>this (88.1%)</b> , so (1.9%), later (1.8%), that (1.1%)
✓	month	month	<b>month (99.4%)</b>
✗	,	and	and (90.8%), , (7.7%)
✗	with	and	and (42.6%), increasing (24.5%), rising (6.3%), <b>with (5.1%)</b> , ...
✓	staff	staff	<b>staff (22.8%)</b> , the (19.5%), employees (6.3%), employee (5.0%), ...
✗	levels	numbers	numbers (69.0%), <b>levels (3.3%)</b> , increasing (3.2%), ...
✗	rising	increasing	increasing (40.1%), <b>rising (35.3%)</b> , climbing (4.4%), rise (3.4%), ...
✓	from	from	<b>from (97.4%)</b>
✓	October	October	<b>October (81.3%)</b> , Oc@@ (12.8%), oc@@ (2.9%), Oct (1.2%)
✗	through	to	to (73.2%), <b>through (15.6%)</b> , until (8.7%)
✓	December	December	<b>December (85.6%)</b> , Dec (8.0%), to (5.1%)
✓	.	.	<b>. (97.5%)</b>

- Better prediction accuracy, even when systems have same BLEU score (state-of-the-art German-English systems, compared to search graph matching)

System	Configuration	BLEU	Word Prediction Accuracy	Letter Prediction Accuracy
Neural	no beam search	34.5	61.6%	86.8%
	beam size 12	36.2	63.6%	87.4%
Phrase-based	-	34.5	43.3%	72.8%

# Recovery from Failure

- Ratio of words correct after first failure

System	Configuration	1	2	3	4	5
Neural	no beam search	55.9%	61.8%	61.3%	62.2%	61.1%
	beam size 12	58.0%	62.9%	62.8%	64.0%	61.5%
Phrase-based	-	28.6%	45.5%	46.9%	47.4%	48.4%

- Depending on probability of user word (neural, no beam)

# Patching Translations

- Decoding speeds
  - translation speed with CPU: 100 ms/word
  - translation speed with GPU: 7ms/word
- To stay within 100ms speed limit
  - predict only a few words ahead (say, 5, in  $5 \times 7\text{ms} = 35\text{ms}$ )
  - patch new partial prediction with old full sentence prediction
  - uses KL divergence to find best patch point in  $\pm 2$  word window
- May compute new full sentence prediction in background, return as update
- Only doing quick response reduces word prediction accuracy 61.6%  $\rightarrow$  56.4%

- Interactivity
- **Choices**
- User Studies
- Confidence
- Adaptation

- Trigger the passive vocabulary
- Display multiple translations for words and phrases

er	hat	seit	Monaten	geplant	,	im	März	einen	Vortrag	...
<b>he has</b>		<b>for months</b>		<b>the plan</b>		<b>in March</b>		<b>a lecture</b>		...
it has		<b>for months now</b>		<b>planned</b>	,	in	March	<b>a presentation</b>		...
he was		for several months		planned to		in the March		a speech		...
he has made		since	months	the pipeline		in March of		a statement		...
he did		for many months		scheduled		the March		a general		...

- Rank and color-highlight by probability of each translation
- Prefer diversity

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Professional Translator

He planned for months to **give a lecture** in Baltimore in November.

give a presentation

present his work

give a speech

speak

User requests alternative translations for parts of sentence.

  - sentence-level
  - word-level

- Machine translation engine indicates where it is likely wrong (also known as quality estimation — Lucia Specia)
- Different Levels of granularity
  - document-level (SDL's "TrustScore")
  - sentence-level
  - word-level
- What are we predicting?
  - how useful is the translation — on a scale of (say) 1–5
  - indication if post-editing is worthwhile
  - estimation of post-editing effort
  - pin-pointing errors

# Sentence-Level Confidence

- Translators are used to “Fuzzy Match Score”
  - used in translation memory systems
  - roughly: ratio of words that are the same between input and TM source
  - if less than 70%, then not useful for post-editing
- We would like to have a similar score for machine translation

- Translators are used to “Fuzzy Match Score”
  - used in translation memory systems
  - roughly: ratio of words that are the same between input and TM source
  - if less than 70%, then not useful for post-editing
- We would like to have a similar score for machine translation
- Even better
  - estimation of post-editing time
  - estimation of from-scratch translation time
  - can also be used for pricing
- Active research question, see also shared task at WMT 2013

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Machine Translation

He has for months planned in November give a lecture in Baltimore.

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Machine Translation

He has for months planned in November give a lecture in Baltimore.

Note: different color for wrong words and reordered words  
(inserted words? missing words?)

# Automatic Reviewing

- Can we identify errors in human translations?
  - missing / added information
  - inconsistent use of terminology

- Can we identify errors in human translations?
  - missing / added information
  - inconsistent use of terminology

## Input Sentence

Er hat seit Monaten geplant, im November einen Vortrag in Baltimore zu halten.

## Human Translation

Moreover, he planned for months to give a lecture in Baltimore.

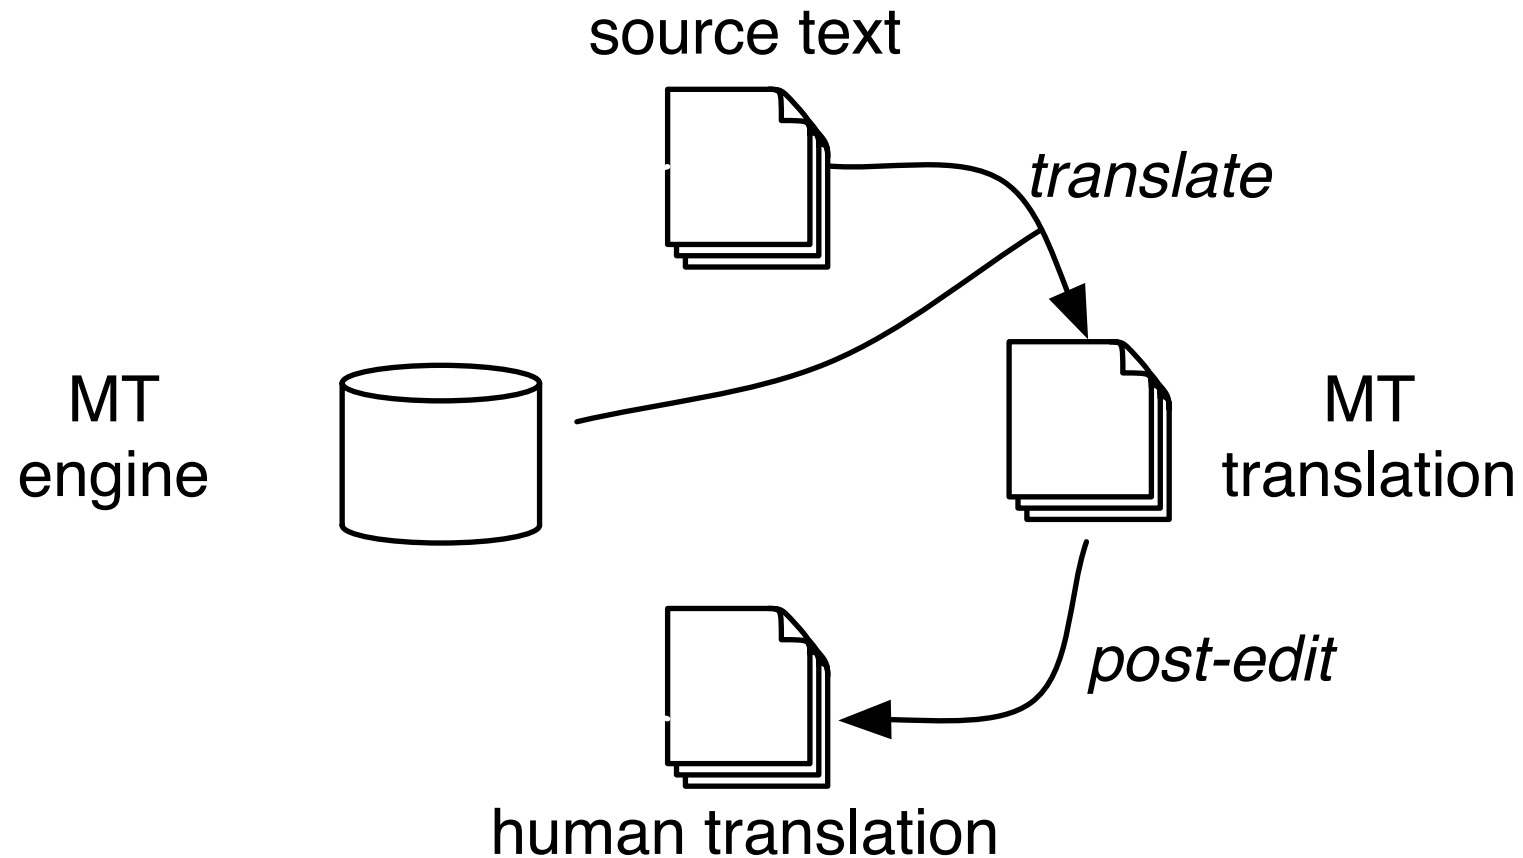

- Interactivity
- Choices
- User Studies
- Confidence
- **Adaptation**

- Machine translation works best if optimized for domain
- Typically, large amounts of out-of-domain data available
  - European Parliament, United Nations
  - unspecified data crawled from the web
- Little in-domain data (maybe 1% of total)
  - information technology data
  - more specific: IBM's user manuals
  - even more specific: IBM's user manual for same product line from last year
  - and even more specific: sentence pairs from current project
- Various domain adaptation techniques researched and used

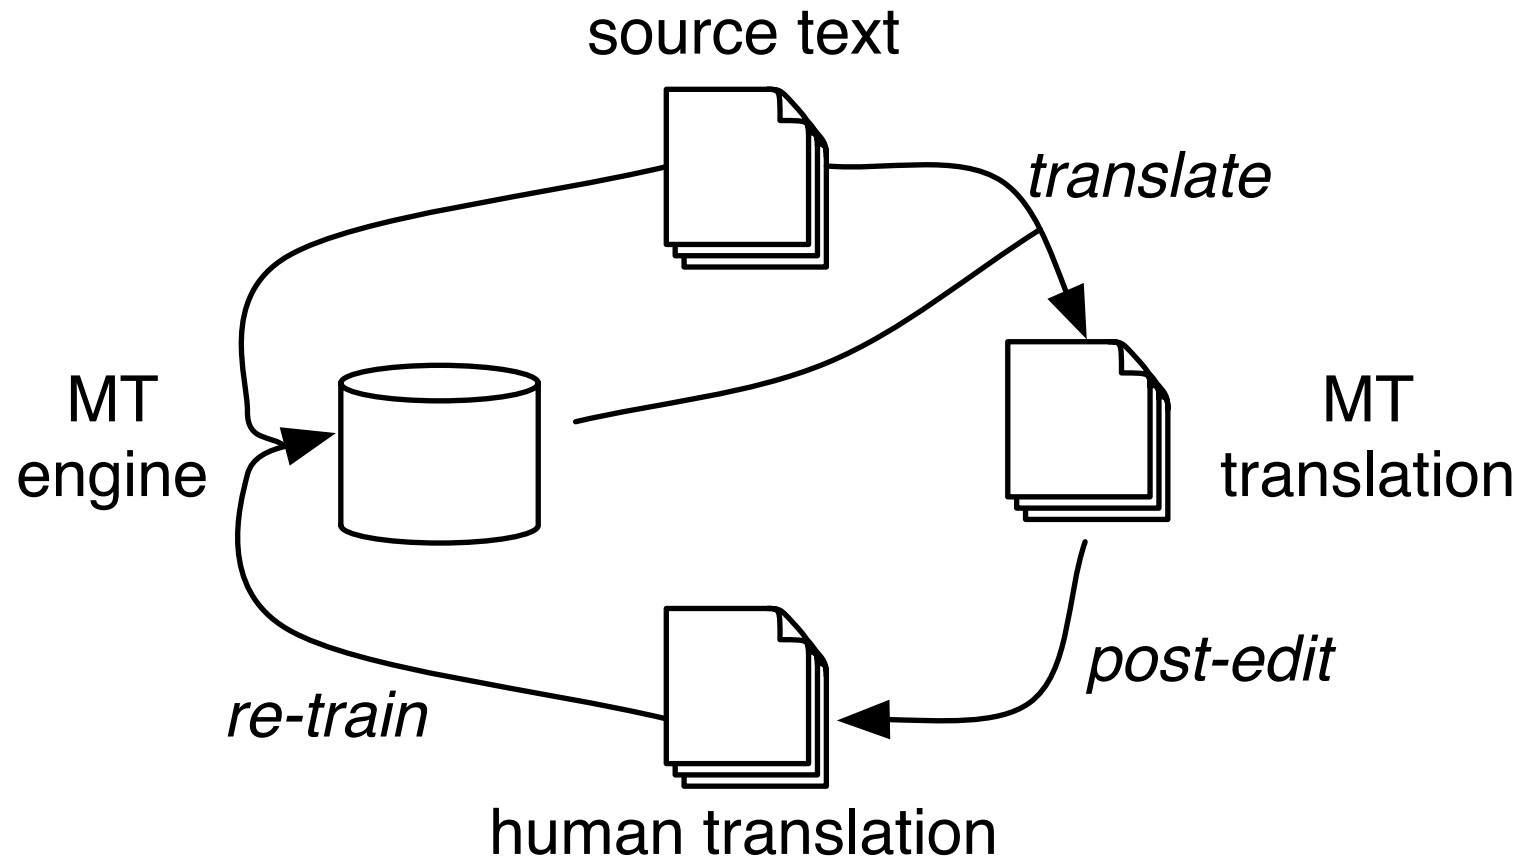

# Incremental Updating

# Incremental Updating

# Incremental Updating

- Statistical machine translation
  - store corpus in memory
  - add new sentence pairs to corpus
  - indexed data structure (suffix arrays) allow quick look-up of translations
- Neural machine translation
  - fine tuning
  - special handling of new words
  - ongoing research in this area

# Summary

- Use of machine translation in translation industry becomes standard
- Interaction between machine and human open problem
- Not very much research in this area
- Open source toolkit: CASKAT
